On April 22, 2025, Huawei officially launched the industry's first fully liquid-cooled megawatt-class supercharging solution at the Smart Electric and Charging Network Strategy Conference, marking

Jointly Charging the Road Ahead Advocating For Sustainable Development of Future-Proof Charging Facility ... Introduction Liquid-cooled power unit is the core part of ultra-fast DC

Huawei Technologies (Thailand) Co., Ltd. is driving the future of electric charging technologies with the launch of its revolutionary FusionCharge Liquid

Huawei fully Liquid-cooled power unit is a product oriented to electric vehicles for efficient energy conversion and power allocation. Compared with traditional solutions, Huawei innovatively adopts the

The emergence of Huawei's 600kW Liquid-Cooled Ultra-Fast Charging pile is bound to accelerate the technology development and wide application of

Huawei integrates digital technology and power electronics technology to enable the charging industry to move towards more advanced productivity. "A new generation of fully liquid

Today, Huawei launched a brand-new fully liquid-cooled 1.5 megawatt-class supercharger for EVs (electric vehicles). It is the industry's first

The official operation of the Everest light storage liquid-cooled super charging station marks that new energy vehicles in the Sichuan-Tibet region have entered the fast lane for energy replenishment,

A key technological innovation is the charger's immersive liquid cooling system. This design tackles the critical challenge of thermal runaway

Huawei Tajlandia Supercharged Liquid Cooled Energy Storage

On March 15, Turkiye"s leading energy company Enerji SA, together with Zebra and Huawei Digital Energy, jointly built the first liquid cooling overcharging station,

We are committed to excellence in solar container and energy storage solutions. With complete control over our manufacturing process, we ensure the highest quality standards in every solar container

Huawei Technology (Thailand) Co., Ltd. launches FusionCharge solution that uses innovative liquid cooling. (liquid-cooled) ultra-fast (ultra-fast) in Thailand at the ASEAN Sustainable

600 kW Huawei Liquid-Cooled Ultra-Fast Charge, faster than Tesla superchargers Huawei is working with its car partner to build better EVs and

Huawei"s fully liquid-cooled supercharging terminal has a maximum output power of 600kW and a maximum current of 600A, making it the highest power charging pile on the market.

The country"s first liquid-cooled supercharging station, a collaboration between Enerji SA, Zebra, and Huawei Digital Energy, is now officially open.
